Dear.....:

Greetings!

The Philippine Society of Medical Technology Students (PHISMETS) is a special program of the Student Development Committee of the Philippine Association of Schools of Medical Technology and Public Health (PASMETH) to serve as a transforming venue for the integral and holistic development of Medical Technology/Medical Laboratory Science students. The organization aims to organize a central body that coordinates all the activities pertinent to Medical Technology student development, promote the growth and development of all Medical Technology students, promote and stimulate the exchange of best practices in Medical Technology through international, national, regional/provincial and local conferences, seminar workshops, colloquia, and meetings, promote, stimulate and support student research in the area of Medical Technology and related fields, provide an information network and monitoring system of activities in the Medical Technology academic community, both in the local and national scene.

In line with this, may we invite your school/institution to be part of PHISMETS as we seize the medical laboratory science education with enriching knowledge, invaluable experience and gratifying fulfillment through its endeavors geared towards the general welfare of the medical technology students.

You may log on to <http://phismets-national.weebly.com> for the procedures and online registration/application for membership/affiliation to PHISMETS.

Thank you very much.

Very truly yours,

MARK ALBEN B. PONCIANO
President, PHISMETS
